### 📄 SUMMARY OF QUALIFICATIONS

Full-stack software engineer specializing in modern web applications using Next.js, React, and Node.js. Experienced in building and deploying scalable, production-grade systems with a strong focus on performance, usability, and clean architecture. Currently working as an independent developer, delivering end-to-end solutions across freelance and product-based projects. Proven ability to design systems, implement backend logic, and craft high-quality user interfaces that meet real business needs.

### 🔑 KEY HIGHLIGHTS

- Built and deployed 5+ production-grade web applications
- Specialized in Next.js (App Router) and full-stack JavaScript architecture
- Strong experience with REST APIs, authentication systems, and CMS integrations
- Focused on performance optimization, SEO, and scalable UI systems
- Comfortable working independently and delivering complete products end-to-end

### 📁 SELECTED PROJECTS

#### Kenstar — Full-Stack eCommerce Platform 📄

Tech Stack: Next.js 14, MongoDB, Cloudinary, REST APIs, Vercel

- Built and deployed a full-stack eCommerce platform with dynamic product management and scalable architecture
- Designed RESTful APIs to handle product data, authentication, and enquiry workflows
- Implemented Cloudinary-based media handling for optimized image storage and delivery
- Developed an admin dashboard enabling non-technical users to manage products and content efficiently
- Optimized performance and deployment workflows using Vercel and modern CI/CD practices
- Enabled business operations by streamlining product management and customer enquiry workflows

#### Raleigh Motorbikes 📄

Tech Stack: React, Bootstrap, CMS Integration

- Developed a responsive website for a motorbike showroom with focus on product presentation
- Integrated CMS for easy content updates and scalability
- Improved user experience through structured layouts and mobile-first design

#### Aquosys Limited Website 📄

Tech Stack: HTML, Bootstrap, JS

- Delivered a **clean, modern web interface** for **Aquosys**, a water solutions company.
- Focused on **SEO, performance optimization**, and **accessibility**, resulting in faster load times and a wider user reach.

#### Delpro Ceramics 📄

Tech Stack: React, Tailwind CSS, REST APIs

- Built a **responsive** eCommerce site for **Delpro Ceramics**, emphasizing smooth user navigation and a **mobile-first approach**.
- Integrated product catalogs with a backend **REST API**, providing real-time data updates and enhancing user engagement.

#### New Song Church — Modern Web Platform 📄

Tech Stack: Next.js, Tailwind CSS, MongoDB, REST APIs, Resend, Cloudinary

- Designed and deployed a modern, responsive web platform improving accessibility and user engagement
- Implemented content management workflows enabling non-technical staff to manage updates independently

## TECHNICAL SKILLS

### Languages

- JavaScript (ES6+), TypeScript

### Frontend

React, Next.js (App Router), Tailwind CSS, Responsive Design

### Backend

Node.js, Express.js, REST APIs, GraphQL

### Databases & Services

MongoDB (Mongoose), Cloudinary, Supabase, Firebase

### Tools & DevOps

Git, GitHub, Docker, Vercel, Postman, CI/CD Workflows

### Design

Figma, Adobe Photoshop, Adobe Illustrator

## EDUCATION

### Bachelor of Science in Applied Computer Technology

United States International University - Africa  
Concentration: Software Engineering

- Integrated backend services for dynamic content, email handling, and media management
- Optimized performance and structure for fast load times and seamless navigation across devices

## PROFESSIONAL EXPERIENCE

### Freelance

Full-Stack Software Engineer

01/2026 – Present | Remote

- Designing and delivering full-stack web applications from concept to production
- Building scalable systems using Next.js, Node.js, and MongoDB
- Managing deployments, performance optimization, and production environments
- Collaborating directly with clients to translate business requirements into technical solutions
- Owning the full development lifecycle, including architecture, implementation, and deployment

### Market Outliers Limited

Frontend Engineer → Full Stack Developer

(Additional responsibilities in graphic design and social media strategy)

08/2023 – 12/2025 | Nairobi, Kenya

- Led development of full-stack applications including eCommerce platforms and CMS-driven websites
- Built responsive and high-performance user interfaces using React and Next.js
- Developed backend APIs and integrated third-party services such as Cloudinary
- Collaborated with design and marketing teams to deliver cohesive digital products
- Contributed to branding, UI design, and digital campaigns using Figma and Adobe tools

### Real Biz Digital

Software Engineer (Internship)

01/2023 – 07/2023 | Nairobi, Kenya

- Developed responsive interfaces using React and Tailwind CSS
- Collaborated with design teams to improve user experience and usability
- Participated in agile workflows including sprint planning and stand-ups
